

We hope that you enjoy the mask(s). My mom and I hand make each one. So they aren't perfect, but they are made with love. We hope that they help slow the spread of Covid-19 and that the sea-life masks spread awareness for the aquatic animal(s) that it features and promotes marine conservation. We also hope that the design(s), has/have special meaning to you. Although it's not comfortable to wear a mask, especially for long periods of time, I hope that these are as comfortable as a mask can be and that it's cute, stylish design creates a bit of excitement to wear.

Stay safe, stay stylish, and stay healthy,

Christina and Linda Barringer

The masks:

100% cotton outer layer with a softer cotton or cotton blend inner layer.

There's a wire fitting in the nose area. Simply, pinch lightly for it to form to your nose. Straps can be tightened by tying another knot or by weaving around the current knot, cutting it and retying a new knot.

Optional add on: Strap adjusters

Straps can be replaced if need be by weaving a new elastic cord through the band opening using a skinny enough device to do so.

Care instructions:

Recommended: Hand wash with warm water and detergent

Alternative: Wash on a delicate cycle in a laundry bag for delicates

Hang, air dry only

Iron, if necessary

In time, you may get some stray hairs popping up on the inside of the mask from the fabric but they can be neatly trimmed with small scissors.

If you love your mask, feel free to tag Christina in a photo on Facebook and/or Instagram @ChristinaBarringer.
